- ◆ Digital Product Creation
- ◆ AI Graphic Design
- ◆ ICT Support & Troubleshooting
- ◆ Client Mentorship & Training
- ◆ Data Management & Reporting
- ◆ Financial Literacy Education
- ◆ Team Collaboration & Leadership

OLUWATOBI MATTI

Forex Trader | AI Automation Specialist | General AI Fluency | Digital Content Creator

PROFESSIONAL PROFILE

A results-driven professional combining 4+ years of Forex trading and mentorship with a rapidly expanding AI and automation skill set. Completed formal AI Automation training at **10Alytics Business** and a **General AI Fluency** internship at **FlyRank AI** in 2026 — adding structured technical depth to an already powerful AI toolkit. Operates across fintech, AI-driven content creation, and business automation: training 40+ traders, building client automation workflows with n8n, producing faceless YouTube content, and delivering responsive websites via Lovable.dev. Brings rare versatility at the intersection of financial markets, AI, and digital entrepreneurship.

TRAINING & CERTIFICATIONS

General AI Fluency Internship

NEW

Jul 2026 – Aug 2026

FlyRank AI • Remote

- Developed proficiency in **General AI Fluency**: LLM architecture, prompt chaining, agent frameworks, and responsible AI deployment practices.
- Gained practical exposure to production-grade AI systems, data flow architecture, and deployment workflows used in real-world AI products.
- Applied AI automation skills to build and optimise workflows that reduced manual processing overhead for clients.
- Strengthened understanding of AI agent design, model behaviour, and best practices for deploying AI systems at scale.

AI Automation Training

NEW

May 2026 – Jun 2026

10Alytics Business • Remote

- Completed a structured **AI Automation programme** covering end-to-end workflow design, AI tool integration, and business process automation using industry-standard platforms.
- Built and deployed automation pipelines integrating AI tools with CRMs, APIs, and data systems — directly applicable to client n8n and ChatGPT automation projects.
- Developed frameworks for identifying high-ROI automation opportunities within business operations and implementing scalable AI-driven solutions.
- Strengthened technical understanding of AI agent design, workflow orchestration, and automation best practices in commercial settings.

WORK EXPERIENCE

Forex Trading Assistant & Mentor

Jan 2021 – Oct 2025

Fisayo Adelabu Forex Academy • Lagos, Nigeria

- Trained **40+ new and intermediate traders** through structured live Forex trading sessions, achieving consistent positive feedback and repeat enrolments.
- Developed and executed technical analysis strategies across Forex, Crypto, and CFD markets, contributing to a **measurable improvement in trader win rates** within the academy.
- Delivered one-on-one mentorship, breaking down complex market concepts — helping trainees progress from beginner to independent trading within **3–6 months**.
- Integrated AI tools (Claude, ChatGPT) to research market insights, generate educational content, and automate reporting — **reducing prep time by ~40%**.
- Fostered a high-performance learning culture that contributed to the academy's growing reputation and client referral rate.

ICT Support Intern

Jul 2016 – Feb 2017

Computer Institute (Mr Segun) • Lagos, Nigeria

- Resolved hardware, software, and network issues for **20+ daily users**, maintaining near-zero downtime across institute operations.
- Managed and organised digital data records, cutting retrieval time and improving file accessibility for staff.
- Produced professional documents, reports, and presentations using Microsoft Office Suite.

AI-POWERED PROJECTS & DIGITAL VENTURES

Faceless YouTube Channel — Google Veo/Flow · Claude AI · ChatGPT · Google Gemini

End-to-end AI content pipeline: animation (Google Flow), scriptwriting (Claude/ChatGPT), narration (Gemini TTS). Channel growing consistently with a fully automated production workflow.

AI Business Automation — n8n · ChatGPT · Claude AI

Deployed n8n automation workflows for businesses — integrating APIs, CRMs, and data pipelines to cut manual workload and operational costs for clients.

Client Website Development — Lovable.dev

Built 3+ responsive client websites using Lovable.dev's AI builder — delivering professional digital presences rapidly and cost-effectively.

Digital Product Creation — Claude AI · ChatGPT

Created sellable digital assets (eBooks, templates, mini-courses) generating passive income via online distribution.

AI Graphic Design — ChatGPT (DALL·E / GPT-4o)

Produces professional flyers and social media visuals — agency-quality output at speed and scale.
